Customer Reviews

Mr. Woods uses only one technique for food preservation: canning. No dehydration, no fermentation, nothing else. And the information in this booklet is **WRONG**. So wrong, it can in fact kill anyone who follows his directions. He purports to be a professional prepper, yet makes rookie mistakes in his canning. 1) one does NOT, ever heat the canning lids or bands before applying to the prepared canning jar. Know why? Each seal is heat activated and works exactly once. If one heats it prior to applying it to the jar, the seal will never work correctly. 2) Mr. Woods directs the cook to tighten the band as tightly as possible once the jar has been filled. According to the U.S.D.A., this is the opposite of the correct procedure. The band should be just finger tight, then turned 1/4 turn beyond. Air must be allowed to escape from the jar in order to create the proper seal. 3) Mr. Woods fails to mention another critical step in his mangling of the canning; after 24 hours the bands must be removed from the canning jars, any food or water wiped off & the seals inspected. Failure to do this **WILL** result in rusting of the lid, followed by rapid decay of the food inside. If the reader desires to can properly, safely please access the U.S.D.A. website or order a copy of their Blue Book on canning. Stay alive! Do NOT follow the directions in this booklet. has the latest book on proper canning techniques. Please buy it! NOT this one. Complete Guide to Home Canning and Preserving (Second Revised Edition)

I have canned food my entire life, taught by two depression era grandmothers. This is not even basic information provided by the USDA for food SAFETY. If you are actually making money off of this drivel shame on you.
